## Oversized Vehicle Registration and Permitting System

The City was interested in automating its Oversize Vehicle registration and permitting process by developing a web-based application that interacts with the City Police Department's Spillman Computer Aided Dispatch (CAD) system. The system was to provide permit processing through the internet, at City counters, and assist City staff in permit administration. The system needed to meet regulations set forth in the oversized vehicle ordinance.

AmbaSoft was selected by the City of Torrance to build their Web Application for oversized Vehicle Registration and Permitting.

The major features of the Oversized Vehicle Registration and Permitting System include:

- A website that enables the citizens to
  - Enter applicant information
  - Purchase permits via credit card
  - Activate permits

- A website that enables The City of Torrance to:
  - Maintain fees and regulations
  - Approve applications and issue permits according to City ordinances
  - Process applicant information
  - Interface with The City of Torrance
    - Cashier system
    - Police Computer Aided Dispatch System
  - Report sales of permits
  - Support a citizen walk-in environment
